

## BALSHAM CLAPPER TIE

**PLEASE NOTE:** The Balsham Clapper Tie is not patented by Richard Pargeter

Tighten screws / bolts so that the spring of the wood holds the catch from slipping, but is not too tight to squeeze with one hand.

Wood ~12mm thick is suitably springy for medium size bells.

**PLEASE NOTE:** Do not enter a bell chamber with the bells up.  
Do not fit to a bell which is in the UP position.
