

DESIGN AND COMFORT

Walk to the back of the church, then to the side aisles, the choir and the front of the church. How do you think where you sit in a service might influence your thoughts and feelings in worship?

Which part of the church did you find the most comfortable or interesting? Are there any places where it might be difficult to join in the service?

When the church was built it would not have had any pews - what difference do you think that would have made to worship?
