

## **SOUNDS AND SPEECH**

Sit in the church and listen - what sounds do you hear? Move around and sit in different places – is there an echo? Does your voice sound different in different places?

Which part of the church is it easiest to be heard from? What difference would a church full of people make?

Find out how people speak in services in church. Experiment by speaking normally, loudly or singing words (intoning). Write down what you have discovered about using your voice in church.
